

BAINSA HACKATHON 2026 · "I MISSED THAT"

One at a time.

An app for a hard-of-hearing person sitting at a table with hearing people.

TABLE.AKILION.AI

- 01 *Shows who is talking, one sentence at a time.*

- 02 *Turns the screen amber when someone asks you something.*

- 03 *Tells you what you missed, in three lines.*

- 04 *Remembers the plans everyone made.*

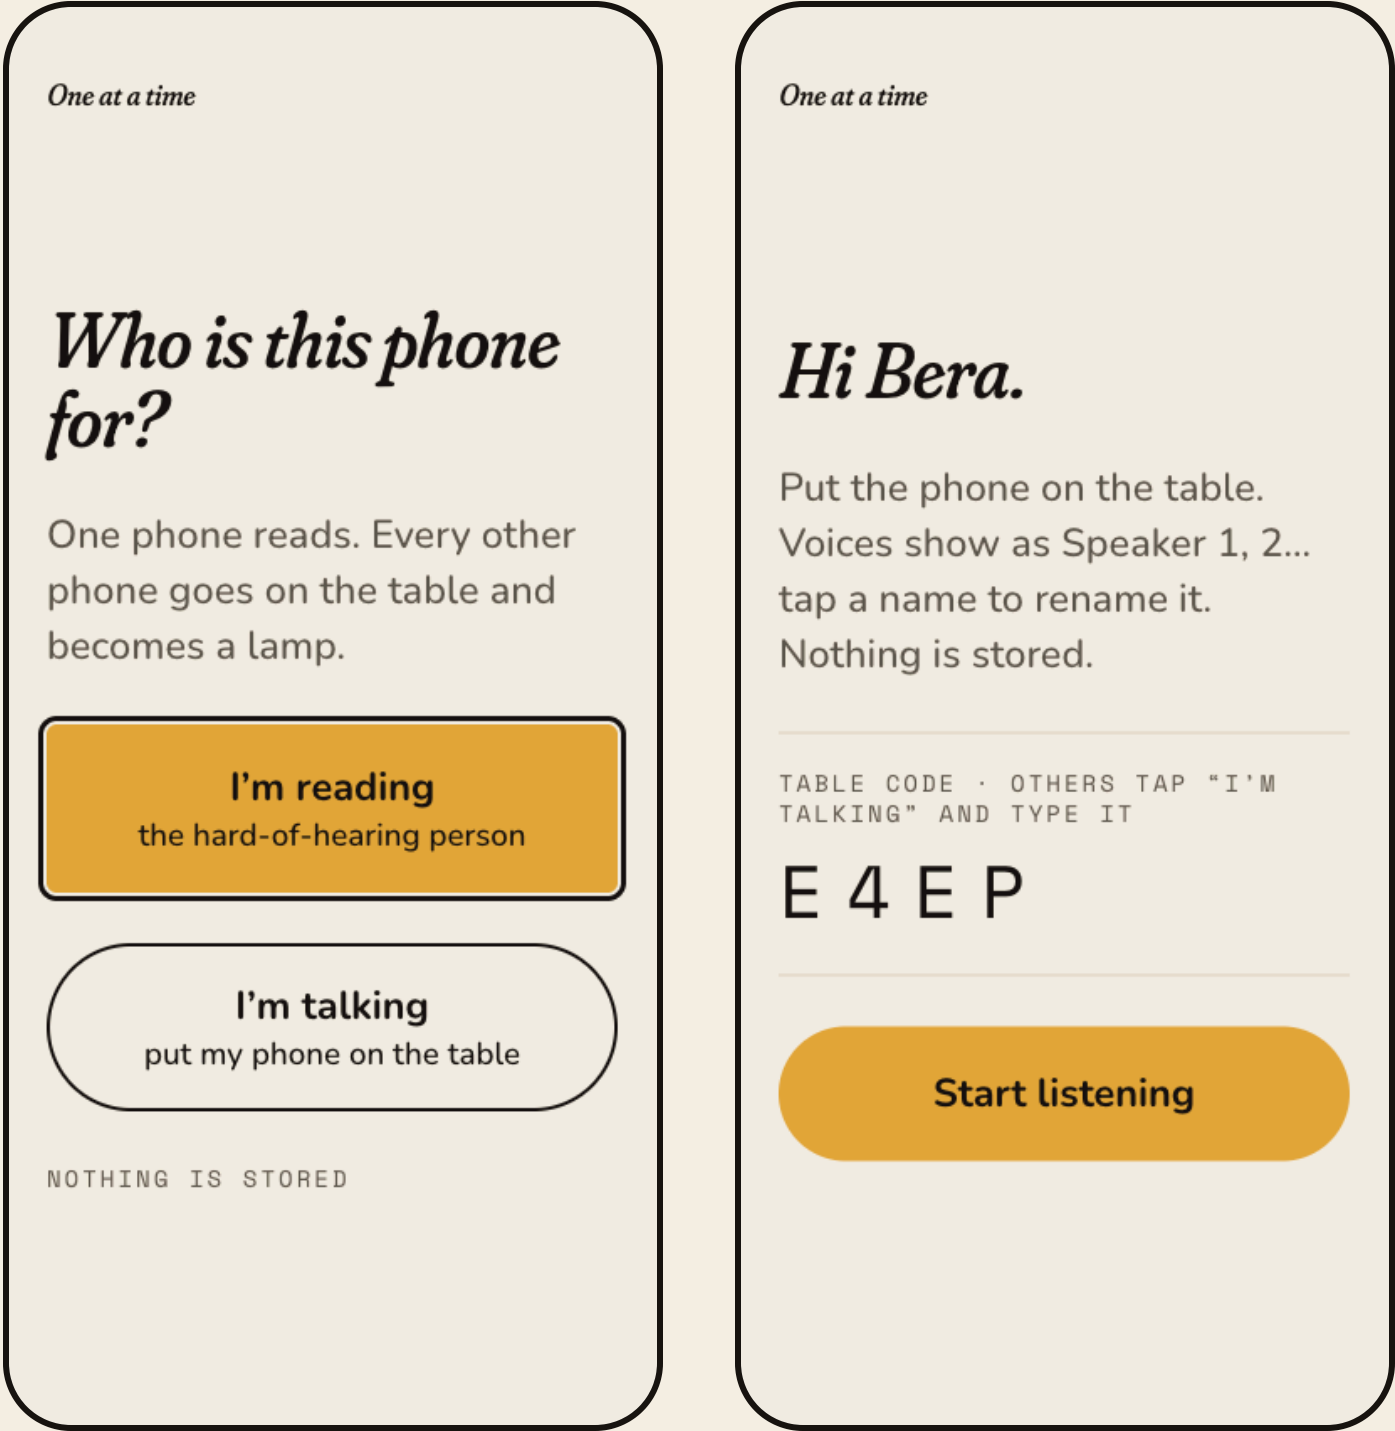

1 Open table.akilion.ai

2 Tap "I'm reading"

3 Type your name

4 Tap "Start listening"

5 Put the phone on the table
The screen shows a 4-letter table code.

One at a time

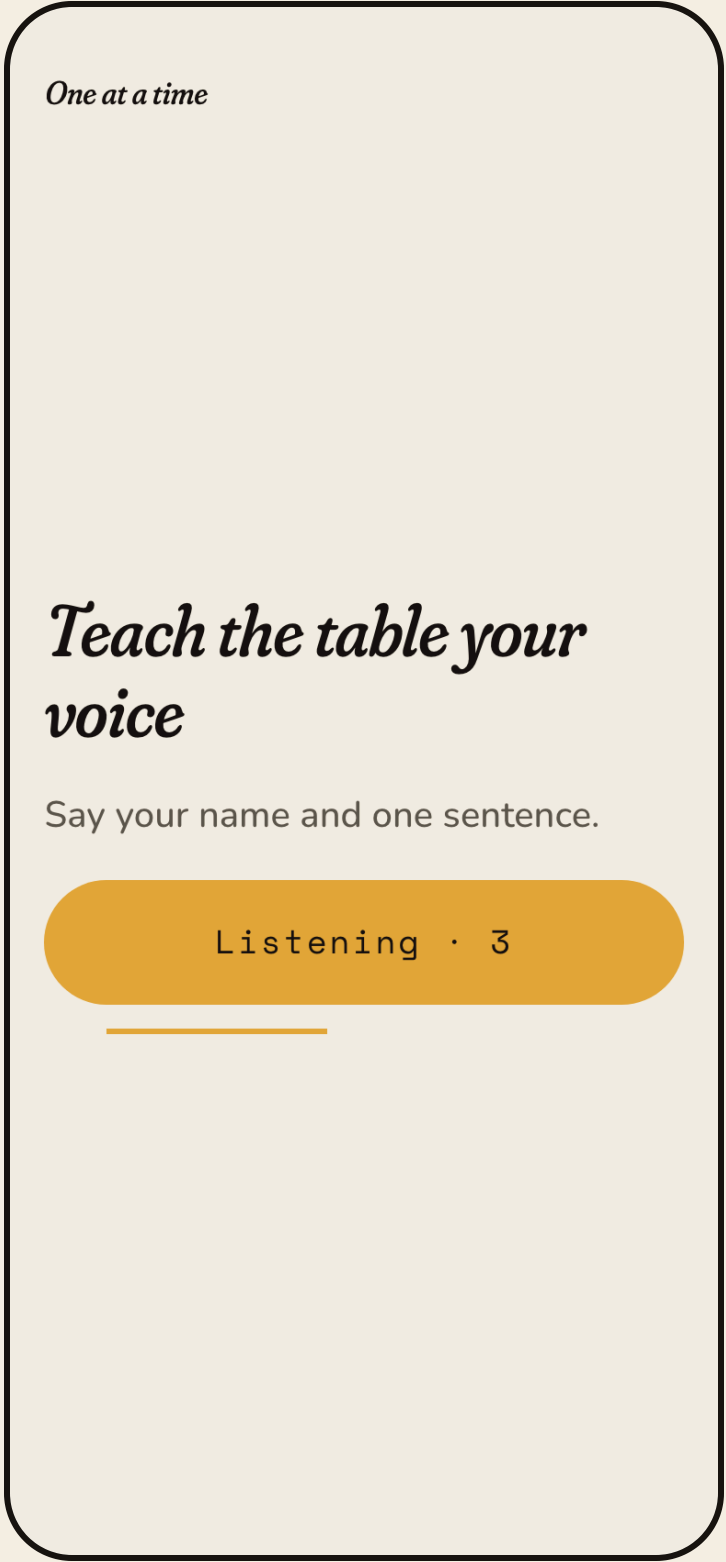

HOW TO USE IT · OTHERS JOIN (OPTIONAL)

Open the **same site** → tap **"I'm talking"** → type the table code.

Their phone becomes a lamp:

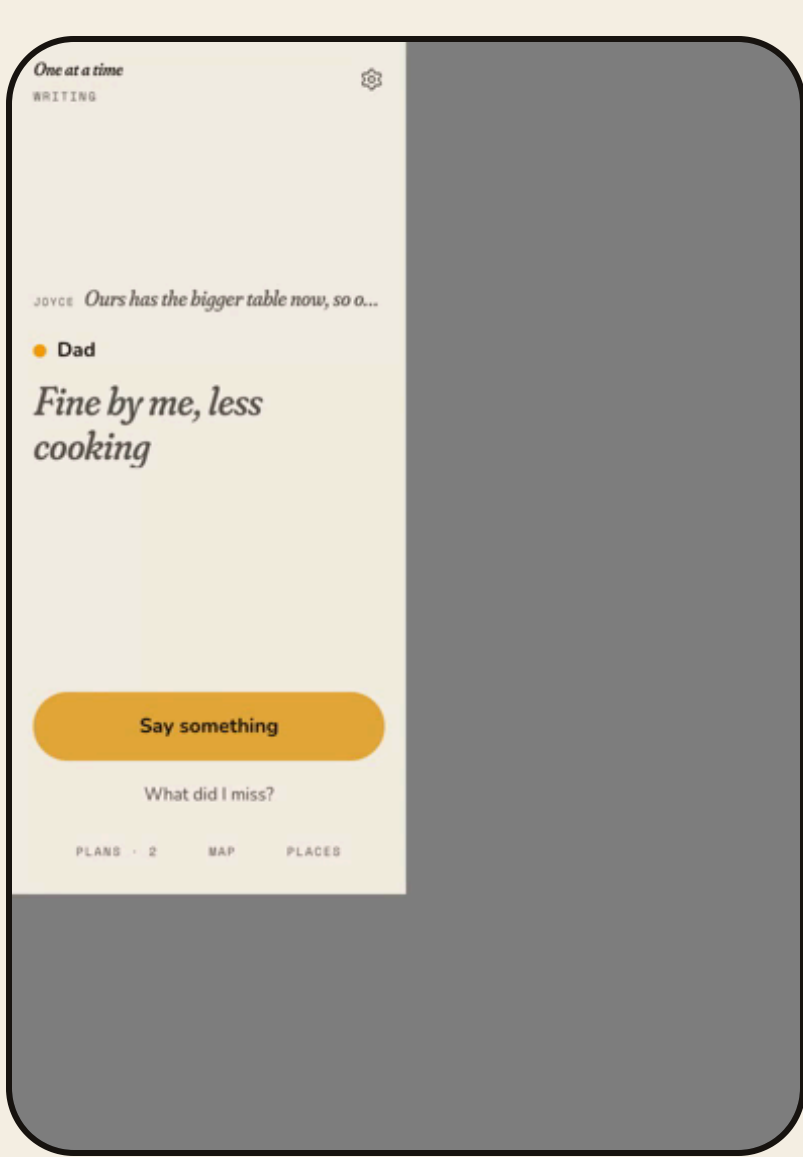

- **Go ahead** — clear to talk
- **One at a time** — two people talking at once
- **Slower** — talking too fast

With one phone only, voices show as *Speaker 1, 2* — tap a name to rename it.

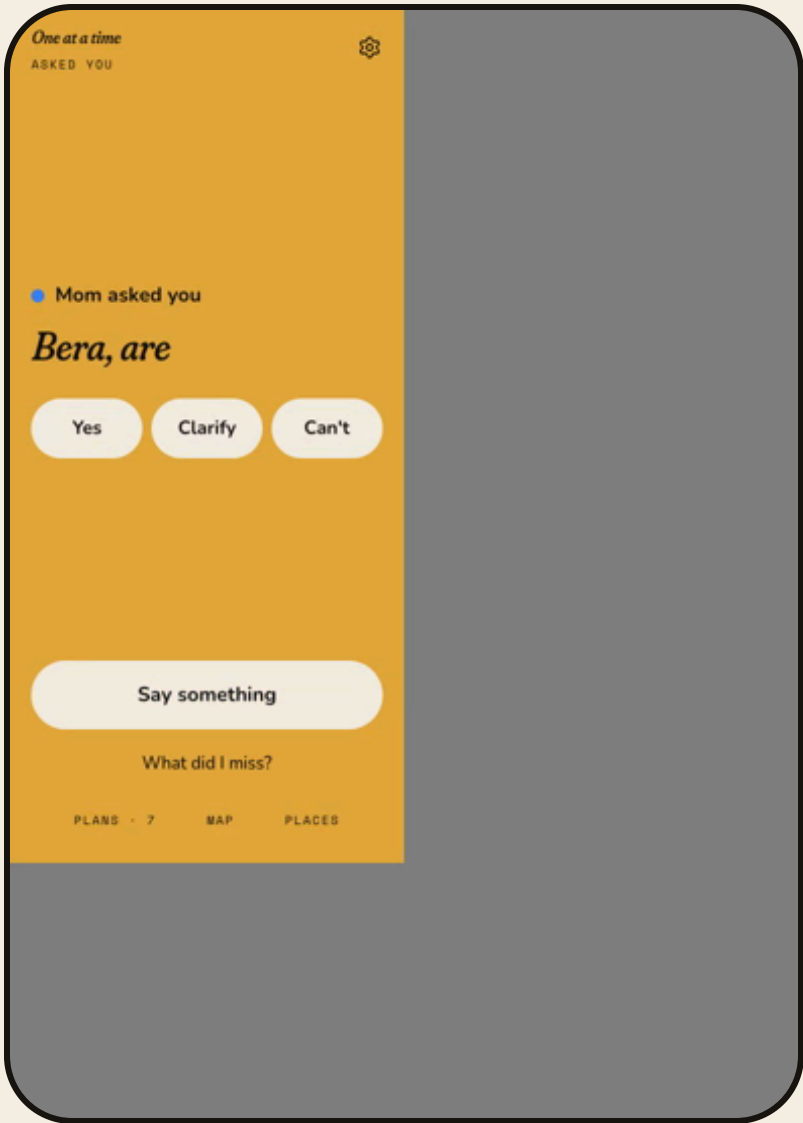

One at a time

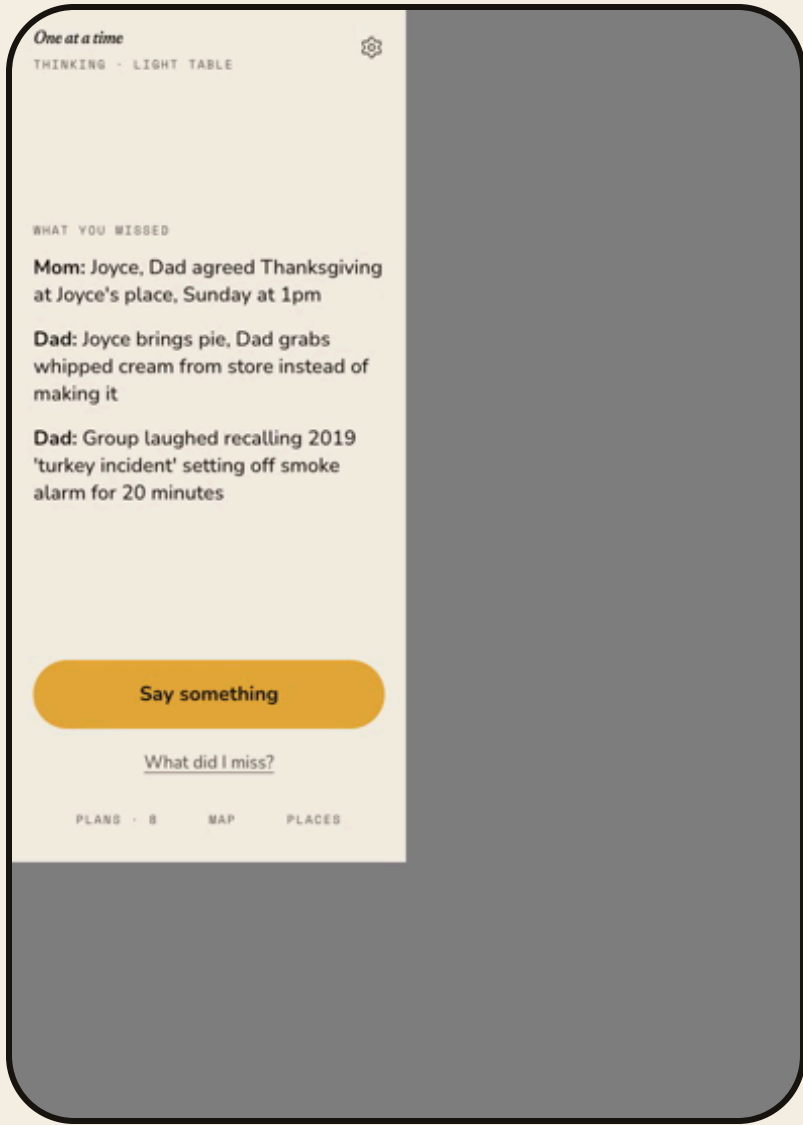

WHILE YOU TALK

One sentence at a time, with the speaker's name.

Someone asks you something — every phone turns amber. Answer with Yes / Clarify / Can't.

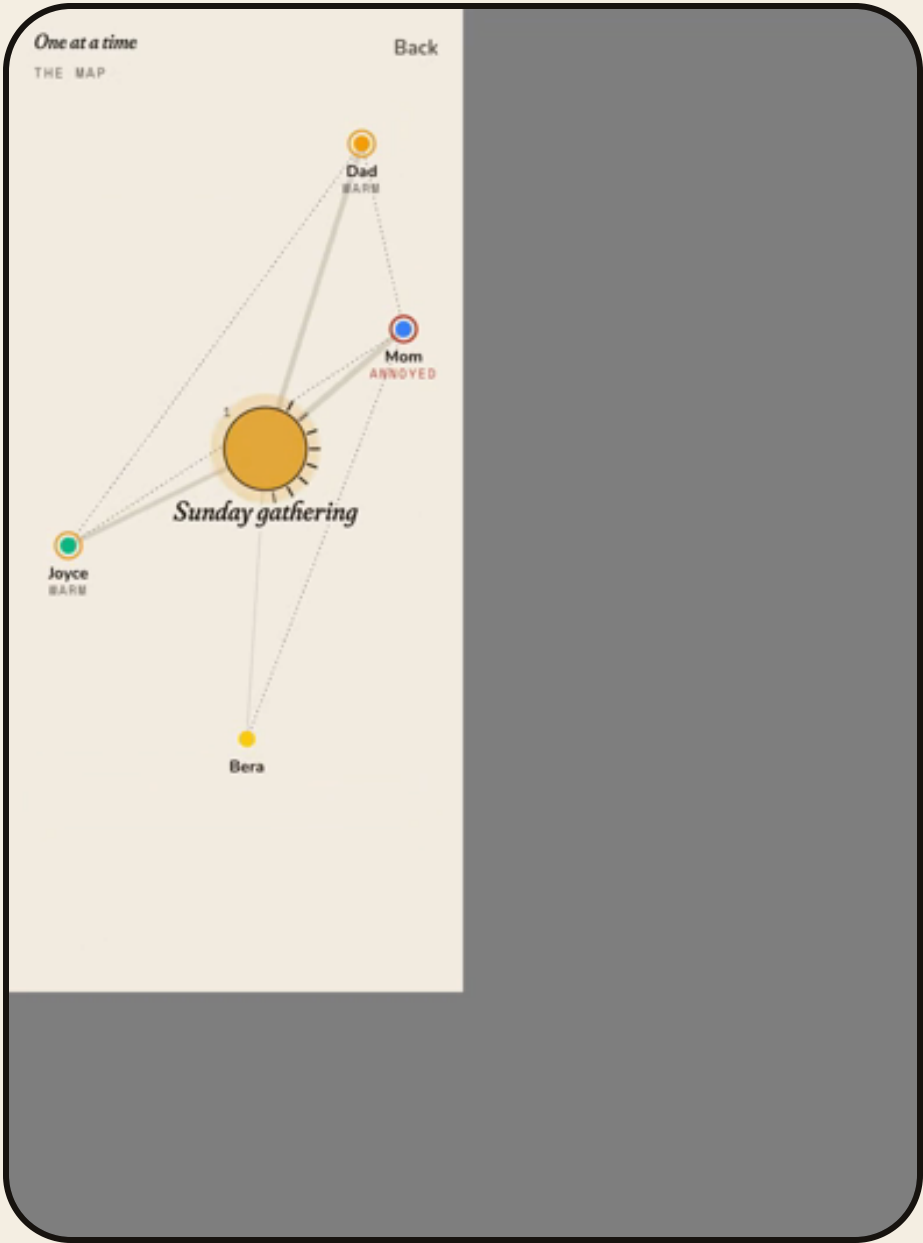

"What did I miss?" — three lines, instantly.

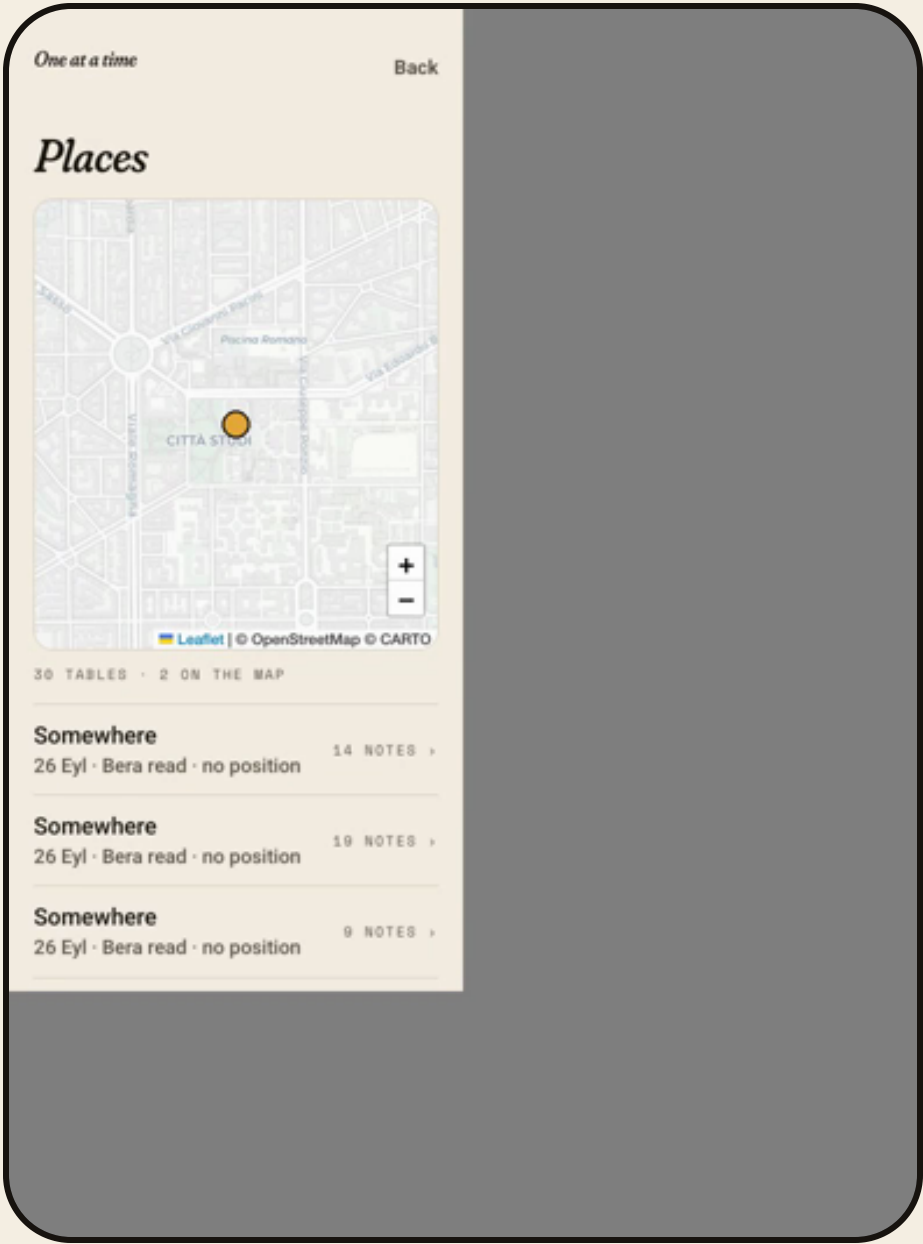

"Say something" puts your words on every phone at the table and reads them aloud.

One at a time

AFTER

Plans made, and a map of where the conversation went.

Places — every table, its date, and its notes.

- *A quiet-ish room works best.*
- *One phone can't hear two people at once — use a phone per person when people talk over each other.*
- *Keep phones plugged in, and the screen on.*
- *Languages: English, Italian, Turkish.*
