

BAINSA HACKATHON 2026 · TOPIC 2 – “I MISSED THAT”

Lacuna.

One at a time.

The first accessibility tool for the hearing side of the table.

TEAM · [NAME] · [NAME] · [NAME] · [NAME]

MILAN · 2026

THE PROBLEM

Every tool puts the work on the person who can't hear.

“I've started just nodding along even when I have no idea what was decided. My boss mentioned something about a new client project last Thursday and I smiled and agreed but I genuinely don't know what I signed up for.”

R/DEAF⁵

“DTS — Dinner Table Syndrome. Deaf people in hearing families are too familiar with this, myself included. It's simply too much work to follow along. That's why you feel like you could sleep for a week.”

R/DEAF, FAMILY SUNDAY LUNCH THREAD⁶

56%

say the **family table** is where hearing well matters most — vs 21% for work. EuroTrak Italy 2022.²

50M

people in the EU report trouble hearing — about 1 in 9.¹

*Nobody asks the table to change anything. **We built the tool for the table.***

THE IDEA

We built the other side.

Hearing people's phones become lamps. Nobody has to be asked.

Go ahead

GREEN

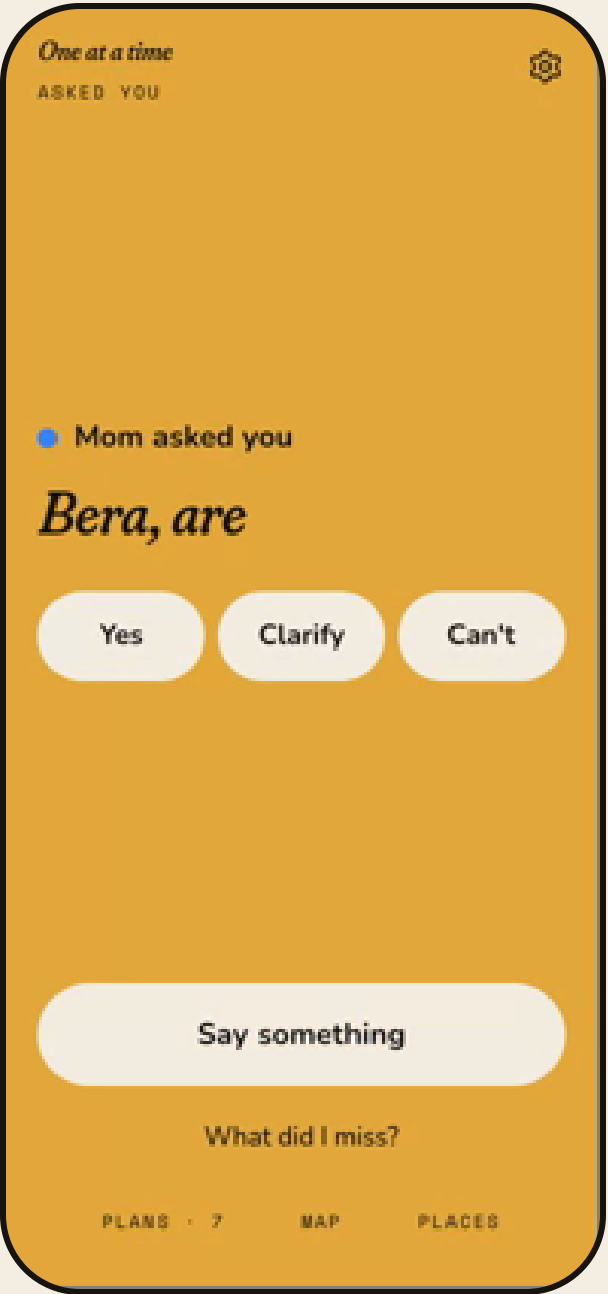

One at a time

AMBER · SLOWER

THE LISTENER

One sentence at a time.

WHO	Named, with tone: <i>warm, teasing, annoyed.</i>
ASKED	Your name is called — the whole phone turns amber. Yes · Clarify · Can't reach every phone.
SAY SOMETHING	Pick a line. It's read aloud to the table.

WHAT YOU MISSED · THE MAP

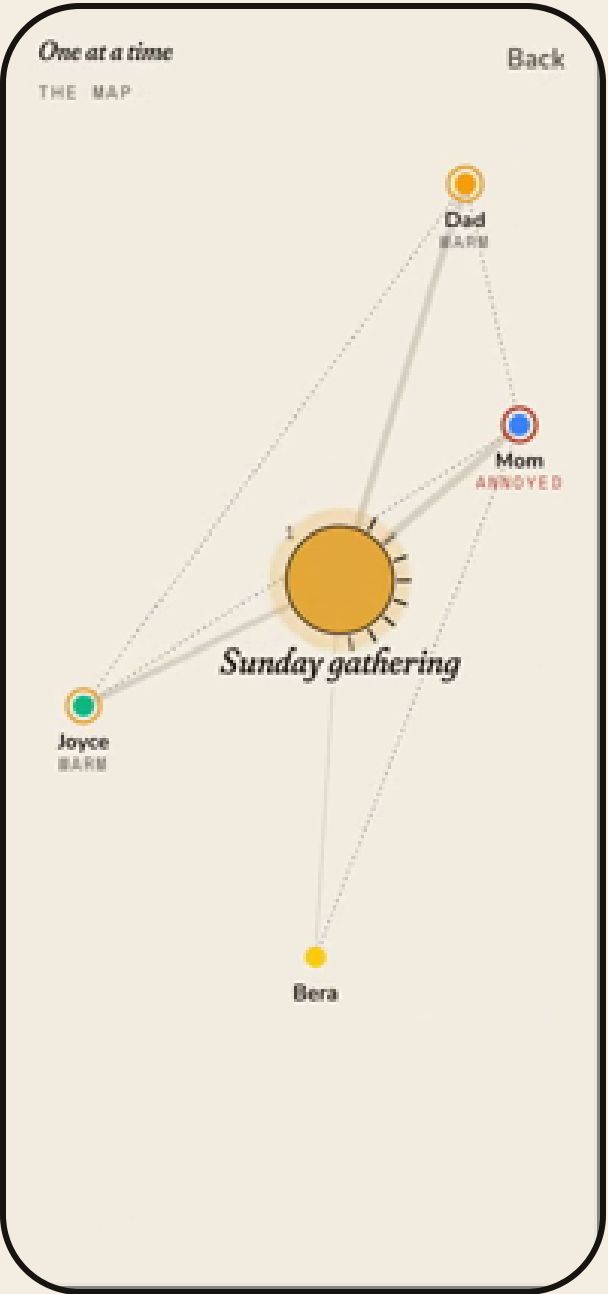

Look away for ten seconds, not the thread.

CATCH-UP

A rolling 3-line summary, refreshed every 10 seconds.

THE MAP

Topics, people, mood — where the conversation went.

MEMORY

Every table, remembered.

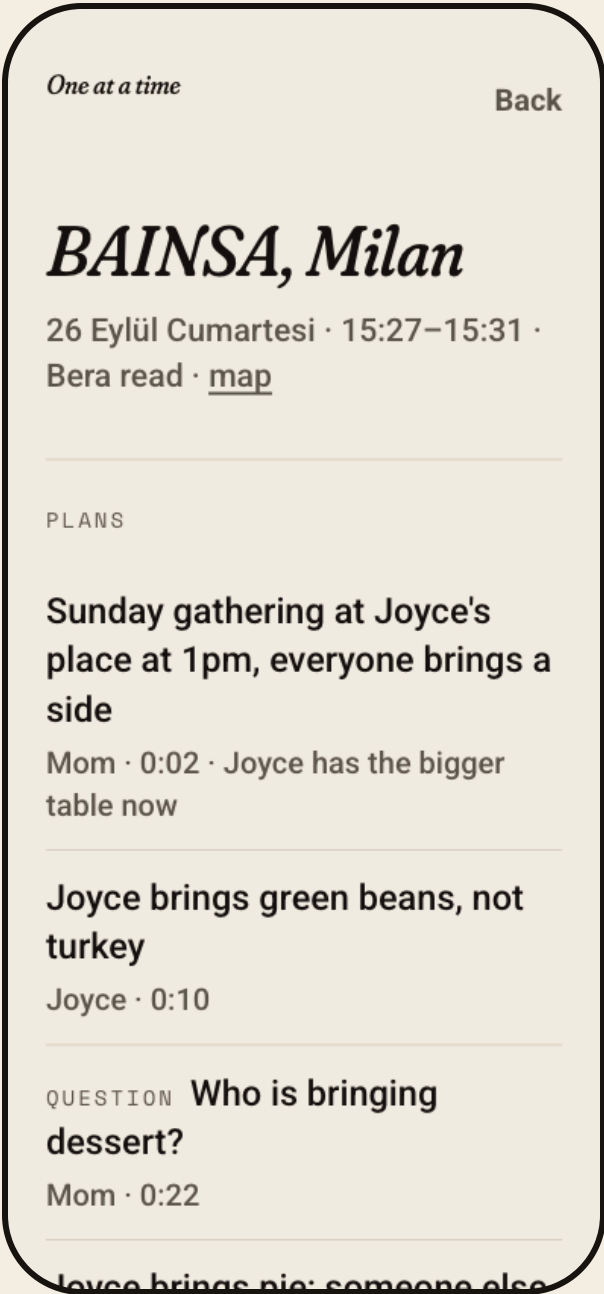

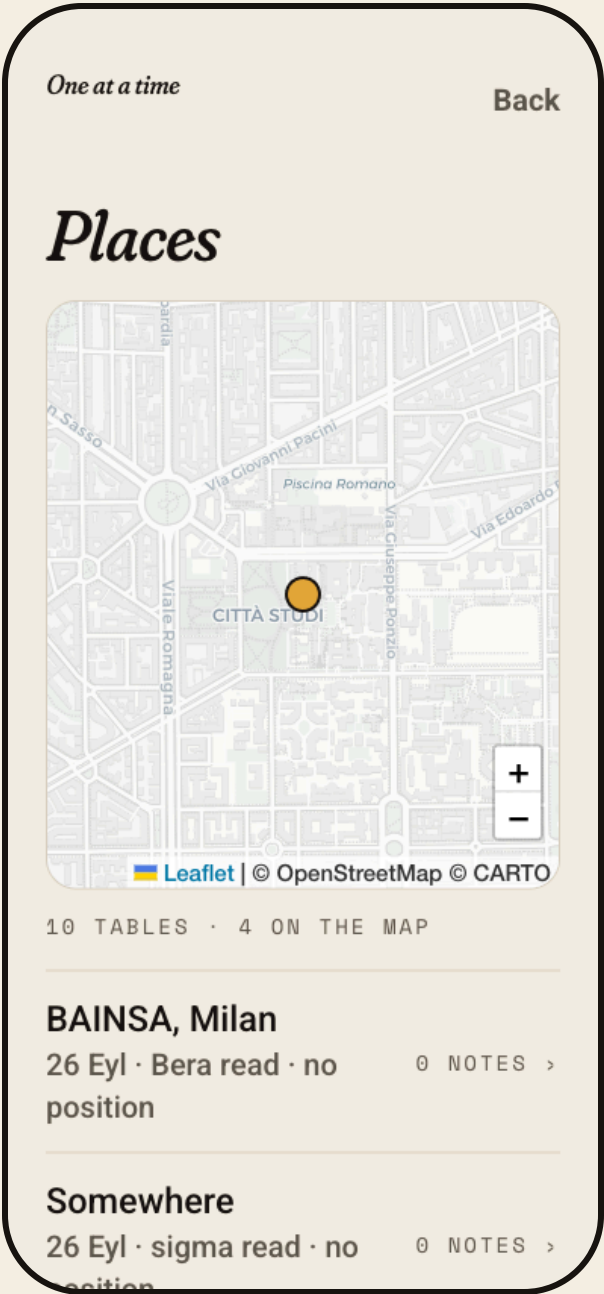

SAVED

Place, date, and the plans made — with the reason behind them.

PLACES

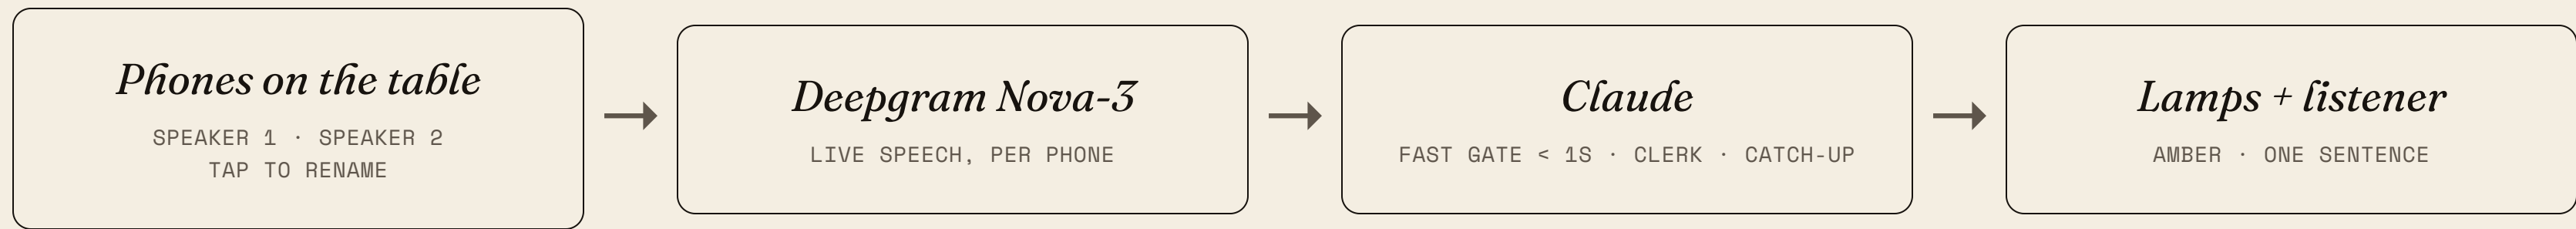

A map of every table you've sat at.

Audio is *never* stored.

HOW IT WORKS

One diagram, simple.

One phone per person, so overlap can be heard as overlap — not guessed.

*No microphone can hear two people at once. That's why the phones turn **amber**.*

LACUNA · ONE AT A TIME

Nothing to wear.

Nothing to install.

The table does its part.
